

♥ Health Minute™

Don't forget your best friend...

By now, most of us have heard about the benefits of fish oil for preventing and managing a multitude of health problems. Did you know that fish oil is just as good for your dog or cat? Its natural anti-inflammatory properties are beneficial for skin allergies, cardiovascular disease, and especially arthritis. After your pet has been taking fish oil for a while, you will also notice the added benefit of a healthier, shinier coat. You can poke a hole in a fish oil capsule with a pin and squirt the oil over your pet's kibble or just feed the capsule as a treat. After all, doesn't your best friend deserve the best?

Tiel, a five year old rescued racing greyhound waits patiently for her fish oil treat. She really loves how shiny it makes her coat.

Fish oil for your best friend	Sharing the wealth
<ul style="list-style-type: none">♥ Pour liquid fish oil over kibble, squeeze fish oil capsules over kibble, or feed capsules directly as a treat♥ Make sure the fish oil you give your pet is as high quality as fish oil you would take yourself (such as Arctic Fresh)♥ Check with your vet for a recommended dose	<ul style="list-style-type: none">♥ Norvegia corporation and Arctic Fresh Omega 3 Fish Oil is proud to partner with many local animal welfare groups to provide medical care for animals in need. This medical care allows animals to heal and to find loving homes.♥
